| 6.     | <b>Brief Description of the Standalone NOS</b>  | The program "Introduction to Cloud Based Robotics Solutions Development" has been designed in collaboration with GROK Learning Pvt. Ltd. The standalone NOS equips students with the skills and knowledge to tackle real-world challenges and unleash their creativity in robotics. Through a series of engaging activities and hands-on projects, students explore the fundamental principles and practical applications of robotics technology. Leveraging innovative tools such as Circuit Designer and Block Designer, students gain proficiency in designing, programming, and controlling robotic systems.   |  |        |  |   |   |   |    |   |                  |    |   |   |    |   |   |    |

### Section 2: Training Related

|    |  |   |
|----|--|---|
| 1. | <b>Trainer's Qualification and experience in the relevant sector (in years) (as per NCVET guidelines)</b>        | B.E./B.Tech in Mechanical/Electrical/Electronics/IT/Comp. Sc. with an experience of 1 years in Robotics/Automation and 1 Year of experience in teaching.<br><br>Diploma in Mechanical/Electrical/Electronics/IT/Comp.Sc. with an experience of 3 years in Robotics/Automation and 2 Year of experience in teaching. |
| 2. | <b>Master Trainer's Qualification and experience in the relevant sector (in years) (as per NCVET guidelines)</b> | B.E./B.Tech in Mechanical/Electrical/Electronics/IT/Comp. Sc. with an experience of 2 years in industry and 1 Year of experience in teaching  |
| 3. | <b>Tools and Equipment Required for the Training</b>   | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No<br>Available at Annexure-II   |
| 4. | <b>In Case of Revised NOS, details of Any Upskilling Required for Trainer</b>                                    | Not Applicable  |

### Section 3: Assessment Related

|    |  |  |
|----|--|--|
| 1. | <b>Assessor's Qualification and experience in relevant sector (in years) (as per NCVET guidelines)</b>                       | B.E./B.Tech in Mechanical/Electrical/Electronics/IT/Comp. Sc. with an experience of 2 years in industry and 1 Year of experience in teaching   |
| 2. | <b>Proctor's Qualification and experience in relevant sector (in years) (as per NCVET guidelines), (wherever applicable)</b> | The assessor carries out theory online assessments through the remote proctoring methodology. Theory examination would be conducted online and the paper comprises MCQ. Conduct of assessment is through trained proctors. Once the test begins, remote proctors have full access to the candidate's video feeds and computer screens. Proctors authenticate the candidate based on registration details, pre-test image captured and I-card in possession of the candidate. Proctors can chat with candidates or give warnings to candidates. Proctors can also take screenshots, terminate a specific user's test session, or re-authenticate candidates based on video feeds. |
| 3. | <b>Lead Assessor's/Proctor's Qualification and experience in relevant sector (in years) (as per NCVET guidelines)</b>        | External Examiners/ Observers (Subject matter experts) are deployed including NIELIT scientific officers who are subject experts for evaluation of Practical examination/ internal assessment / Project/ Presentation/ assignment and Major Project (if applicable). Qualification is generally B.Tech   |
| 4. | <b>Assessment Mode</b> (Specify the assessment mode)   | Centralized online examination will be conducted   |

|    |  |  |
|----|--|--|
| 5. | <b>Tools and Equipment Required for Assessment</b> | Same as for training <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No |
|----|--|--|

#### Section 4: Evidence of the Need for the Standalone NOS

|    |  |
|----|--|
| 1. | Government /Industry initiatives/ requirement (Yes/No): <b>Yes.</b>  |
| 2. | Number of Industry validation provided: <b>16</b>  |
| 3. | Estimated number of people to be trained: <b>1000</b> persons per year shall be trained.   |
| 4. | Evidence of Concurrence/Consultation with Line/State Departments (In case of regulated sectors): No.<br><br><b>NIELIT is recognized as AB and AA under Government Category. NIELIT is an HRD arm of MeitY, therefore, the Line Ministry Concurrence is not required.</b> |

#### Section 5: Annexure & Supporting Documents Check List

Specify Annexure Name / Supporting document file name.

|    |  |  |
|----|--|--|
| 1. | <b>Annexure:</b> NCrF/NSQF level justification based on NCrF/NSQF descriptors ( <i>Mandatory</i> )   | Available at Annexure-I: Evidence of Level     |
| 2. | <b>Annexure:</b> List of tools and equipment relevant for NOS ( <i>Mandatory, except in case of online course</i> )  | Available at Annexure-II: Tools and Equipment  |
| 3. | <b>Annexure: Industry Validation</b>   | Available at Annexure-III: Industry Validation |
| 4. | <b>Annexure: Training Details</b>  | Available at Annexure-IV: Training Details     |
| 5. | <b>Annexure:</b> Blended Learning ( <i>Mandatory, in case the selected Mode of delivery is Blended Learning</i> )  | Available at Annexure-V: Blended Learning      |
| 6. | <b>Annexure/Supporting Document:</b> Standalone NOS- Performance Criteria Details Annexure/Document with PC-wise detailing as per NOS format ( <i>Mandatory- Public view</i> ) | Available at Annexure-VI: Performance Criteria |

|     |  |   |
|-----|--|---|
| 7.  | <b>Annexure:</b> Performance and Assessment Criteria (Mandatory) | Available at Annexure-VII: Detailed Assessment Criteria |
| 8.  | <b>Annexure:</b> Assessment Strategy (Mandatory)                 | Available at Annexure-VIII: Assessment Strategy         |
| 9.  | <b>Annexure:</b> Acronym and Glossary (Optional)                 | Available at Annexure-IX: Acronym and Glossary          |
| 10. | <b>Supporting Document:</b> Model Curriculum                     | Available at Annexure-C: Model Curriculum               |

#### Annexure-I: Evidence of Level

| NCrF/NSQF Level Descriptors   | Key requirements of the job role/ outcome of the qualification   | How the job role/ outcomes relate to the NCrF/NSQF level descriptor   | NCrF/NSQF Level |
|---|--|---|-----------------|
| <b>Professional Theoretical Knowledge/Process</b>   | Upon completion of the program, individuals will navigate the evolving landscape of Industry 4.0 revolution technology and embark on a rewarding career path in Robotics .<br>The promising roles include:<br>- Robotics Technician<br>- Mechanical Engineer<br>- Design Engineer<br>- Sales Engineer  | An efficient Robotics expert with cloud computing knowledge and having variety of skillsets required to solve real world problems faced across industry verticals.                        | 3.5             |
| <b>Professional and Technical Skills/ Expertise/ Professional Knowledge</b>                 | Effectively apply concepts to build smart robotic solutions for different industries.<br>Develop new use case to address a real-life problem.  | Individuals completing this qualification are likely to possess the expertise required for roles in the field of Robotics Applications Development  | 3.5             |
| <b>Employment Readiness &amp; Entrepreneurship Skills &amp; Mind-set/Professional Skill</b> | Emphasis on what industries is expecting from them as a skill to build, through applied learning and execution platform to become problem solvers with critical thinking, thought leaders, innovators, and job creators. Ability to transform ideas into real-life solutions using technological tools. Entrepreneurial ability to launch their own business /service. | After completing this program students will be in a better position to fulfill expectations from industry that offers unique opportunities for career development in this exciting field. | 3.5             |

|  |   |   |     |
|--|---|---|-----|
| <b>Broad Learning Outcomes/<br/>Core Skill</b> | Individuals with cloud-based Robotics skillset will contribute to organizational success and take up roles in the evolving landscape of Industry 4.0 revolution | This program prepares the candidates to adapt to current industry demands.  | 3.5 |
| <b>Responsibility</b>                          | Able to design new IoT applications for different industry verticals and able to manage and maintain existing IoT applications                                  | Takes complete responsibility for delivery and quality of own work and output as also the subordinates.<br>Shares responsibility for the group tasks. | 3.5 |

### Annexure II: Tools and Equipment (lab set-up)

List of Tools and Equipment

**Batch Size: 30**

| <b>S. No.</b> | <b>Tool / Equipment Name</b>               | <b>Specification</b>  | <b>Quantity for specified Batch size</b>   |
|---------------|--|---|--|
| 1             | Classroom                                  | 1 (750Sq. ft to 1000 Sq. ft.)   | 30   |
| 2             | Students Chair                             | 30  | 30   |
| 3             | Students Table                             | 15 (2 students sharing 1 table)   | 15   |
| 4             | Desktop computer with accessories / Laptop | Laptop with minimum specifications: Intel I3 or Celeron processor with at least 8GB RAM, 512GB SSD Hard disk integrated with graphics card, Display size 15.6 inch, Wifi connectivity and Wired Optical Mouse.                      | 15   |
| 5             | Cloud Based IoT Infrastructure             | Complete stack comprising of circuit building software,no-code block level programming software, Python editor and knowledge-based modules on IoT content with web application management interface using cloud based IoT services. | Should support multiple concurrent logins. |
| 6             | Hardware                                   | Microprocessors and Sensors like IR sensor, Ultrasonic Sensor, Buzzer, Motors, LED module, Weight sensors, Accelerometer, GPS, Gyroscope  | 15   |

|   |   |  |   |
|---|---|--|---|
| 7 | Cloud connected working industry applications | <ul style="list-style-type: none"> <li>Activities for different movements of a Robot</li> <li>Train your Robot to Change Path</li> <li>Obstruction Detection - Line Following</li> <li>Train your Robot to find a path through the maze</li> <li>Train your robot to memorize directions and path</li> <li>Train your robot to follow a line using PID Controller</li> </ul> | 5 |
| 8 | Internet Connectivity                         | Seamless internet with at least 100Mbps without firewall   |   |

Classroom Aids for offline and blended mode of training:

The aids required to conduct sessions in the classroom are:

1. LCD Projector/Smart Board

#### Annexure III: Industry Validations/ Government Recognition Summary

| S. No | Organization Name          | Representative Name | Designation                   | Contact Address   | Contact Phone No | E-mail ID  |
|-------|----------------------------|---------------------|-------------------------------|---|------------------|--|
| 1     | AISECTLtd.                 | Teena Panthi        | Assistant Manager             | 1-1-387, 3rd Floor, Flat no. 403/404, GNR Heights, Above SBI, Bakaram Road, Musheerabad, Hyderabad - 500020 | 7879982075       | <a href="mailto:teena.panthi@aisect.org">teena.panthi@aisect.org</a>               |

#### Annexure IV: Training Details

##### Training Projections:

| Year    | Estimated Training # of Total Candidates | Estimated training# of Women | Estimated training# of People with Disability |
|---------|--|------------------------------|---|
| 2024-25 | 1000                                     | 200                          | 20  |
| 2025-26 | 1000                                     | 200                          | 20  |
| 2026-27 | 1000                                     | 200                          | 20  |

Data to be provided year-wise for the next 3 years

#### Annexure V: Blended Learning

##### Blended Learning Estimated Ratio & Recommended Tools:

Refer NCVET "Guidelines for Blended Learning for Vocational Education, Training & Skilling" available on:

| S. No. | Select the Components of the NOS | List Recommended Tools – for all Selected | Offline: Online |
|--------|----------------------------------|---|-----------------|
|        |                                  |   |                 |

|   |   | <b>Components</b>   | <b>Ratio</b> |
|---|---|---|--------------|
| 1 | Theory/ Lectures - Imparting theoretical and conceptual knowledge                   | Online interaction platforms like Zoom, Google Meet   | 00:100       |
| 2 | Imparting Soft Skills, Life Skills and Employability Skills /Mentorship to Learners | NA  | NA           |
| 3 | Showing Practical Demonstrations to the learners                                    | Online interaction platforms like Zoom, Google Meet   | 00:100       |
| 4 | Imparting Practical Hands-on Skills/ Lab Work/ workshop/ shop floor training        | PCs/Laptops, Internet, Cloud based IoT infrastructure using circuit building software, no-code block level programming software, Python direct IDE, knowledge-base modules on IoT content with mobile interface for cloud based remote management of IoT applications | 50:50        |
| 5 | Tutorials/ Assignments/ Drill/ Practice   | Online interaction platforms like Zoom, Google Meet   | 00:100       |
| 6 | Proctored Monitoring/ Assessment/ Evaluation/ Examinations                          | Examination   | 50:50        |
| 7 | On the Job Training (OJT)/ Project Work Internship/ Candidate Training              | Build and demonstrate a new IoT solution for any specific industry vertical based on problem statement  | 100:00       |

#### **Annexure VI: Standalone NOS- Performance Criteria details**

##### **1. Description**

The standalone NOS equips students with the skills and knowledge to tackle real-world challenges and unleash their creativity in robotics. Through a series of engaging activities and hands-on projects, students explore the fundamental principles and practical applications of robotics technology. Leveraging innovative tools such as Circuit Designer and Block Designer, students gain proficiency in designing, programming, and controlling robotic systems.

## 2. Scope

The robotics course offers a comprehensive exploration of key concepts, practical skills, and innovative applications in robotics, covering topics such as robot components, circuit design, and advanced motion control.

## 3. Elements and Performance Criteria

### *Problem Solving:*

PC1. Develop the ability to devise industry-specific solutions that effectively tackle real-world challenges encountered in robotics applications, demonstrating analytical skills and innovative problem-solving approaches.

### *Block Programming for Robotics Solution Development:*

PC2. Utilize block programming software tools proficiently to write application programs tailored for controlling robots and implementing various functionalities, ensuring ease of implementation and flexibility in program logic.

PC3. Demonstrate proficiency in crafting complex logic and algorithms using block programming techniques to address specific challenges and tasks inherent in robotics applications, fostering creativity and adaptability in solution development.

### *Foundational Skills in Robotics:*

PC4. Acquire a comprehensive understanding of the fundamental principles and concepts underpinning robotics technology, encompassing robot components, sensors, actuators, and microcontrollers, to lay a solid foundation for advanced robotics proficiency.

PC5. Identify and articulate the pivotal role of essential sensors and components in robotics applications, including IR sensors, ultrasonic sensors, motors, microcontrollers, and batteries, and elucidate their functions and significance in enabling robot functionality.

PC6. Design and implement functional circuits tailored for robotics applications using circuit building software, ensuring compatibility with selected sensors and components, and demonstrating proficiency in integrating hardware elements for seamless robotic operation.

#### **4. Knowledge and Understanding (KU):**

KU1. Gain insight into the far-reaching impact of robotics across various industries and everyday life contexts, with illustrative examples of robotics applications in healthcare, agriculture, aerospace, and education, fostering an appreciation for the diverse applications of robotic technology.

KU2. Acquire hands-on experience in robotics application development through practical projects that address real-world challenges and opportunities, enabling the application of theoretical knowledge in practical contexts and promoting experiential learning.

KU3. Develop a solid grasp of electronics fundamentals and sensor technology relevant to robotics, encompassing the principles of signal transmission, sensor integration, and actuator control, to facilitate informed decision-making and effective problem-solving in robotics projects.

KU4. Understand the nuances of robotics communication protocols and microcontrollers, including their functionalities and applications in robot control and data transmission, enabling efficient communication and coordination in robotic systems.

KU5. Master programming logic and block programming using Python language, equipping oneself with essential programming skills to develop and optimize robotic applications

#### **5. Generic Skills (GS):**

GS1. Cultivate problem-solving abilities to effectively address challenges encountered in diverse industries, such as transportation and security, enhancing adaptability and resilience in navigating complex problem spaces.

GS2. Develop technical proficiency in electronics, programming, and sensor integration, essential for designing and implementing robotic solutions that meet industry-specific requirements and performance standards.

GS3. Foster innovation and creativity in robotics application development, encouraging out-of-the-box thinking and novel approaches to addressing real-world challenges and driving technological advancement.

GS4. Enhance communication skills to effectively convey complex concepts, project requirements, and technical insights to diverse audiences, fostering collaboration, understanding, and knowledge sharing in robotics projects and initiatives.

**Annexure VII: Assessment Criteria**

Detailed PC-wise assessment criteria and assessment marks for the NOS are as follows:

| SNOS Name  | Assessment Criteria for Performance Criteria  | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|--|---|--------------|-----------------|---------------|------------|
| Introduction to Cloud Based Robotics Solutions Development<br><br>NOS Code:<br>NIE/ELE/N0601 | <i>Problem Solving</i><br><br>PC1. Ability to build industry solutions that address real Industry challenges.   | 10           | 10              | -             | -          |
|  | <i>Block Programming for Robotics Solution Development:</i><br><br>PC2. Utilize block programming software tools proficiently to write application programs tailored for controlling robots and implementing various functionalities, ensuring ease of implementation and flexibility in program logic.     | 40           | 40              | 20            |            |
|  | PC3. Demonstrate proficiency in crafting complex logic and algorithms using block programming techniques to address specific challenges and tasks inherent in robotics applications, fostering creativity and adaptability in solution development.   |              |                 |               |            |
|  | <i>Foundational Skills in Robotics</i><br><br>PC4. Acquire a comprehensive understanding of the fundamental principles and concepts underpinning robotics technology, encompassing robot components, sensors, actuators, and microcontrollers, to lay a solid foundation for advanced robotics proficiency. | 50           | 10              | -             | 20         |
|  | PC5. Identify and articulate the pivotal role of essential sensors and components in robotics applications, including IR sensors, ultrasonic sensors, motors, microcontrollers, and batteries, and elucidate their functions and significance in enabling robot functionality.                              |              |                 |               |            |
|  | PC6. Design and implement functional circuits tailored for robotics applications using circuit building software, ensuring compatibility with selected sensors and components, and demonstrating proficiency in integrating hardware elements for seamless robotic operation.                               |              |                 |               |            |

|  | <b>Total Marks-200</b> | 100 | 60 | 20 | 20 |
|--|------------------------|-----|----|----|----|

### **Annexure VIII: Assessment Strategy**

This section includes the processes involved in identifying, gathering, and interpreting information to evaluate the Candidate on the required competencies of the program.

Assessment of the qualification evaluates candidates to ascertain that they can integrate knowledge, skills and values for carrying out relevant tasks as per the defined learning outcomes and assessment criteria.

The underlying principle of assessment is fairness and transparency. The evidence of the outcomes and assessment criteria. competence acquired by the candidate can be obtained by conducting Theory (Online) examination.

#### **About Examination Pattern:**

1. The question papers for the theory exams are set by the Examination wing (assessor) of NIELIT HQS.
2. The assessor assigns the roll number.
3. The assessor carries out theory assessments. Theory examination would be conducted online, and the paper comprise of MCQ.
4. Pass percentage would be 50% marks.
5. The examination will be conducted in English language only.

Quality assurance activities: A pool of questions is created by a subject matter expert and moderated by other SME. Test rules are set beforehand. Random set of questions which are according to syllabus appears which may differ from candidate to candidate. Confidentiality and impartiality are maintained during all the examination and evaluation processes.

### Annexure IX: Acronym and Glossary

#### Acronym

| Acronym | Description                              |
|---------|--|
| AA      | Assessment Agency                        |
| AB      | Awarding Body                            |
| NCrF    | National Credit Framework                |
| NOS     | National Occupational Standard(s)        |
| NQR     | National Qualification Register          |
| NSQF    | National Skills Qualifications Framework |

#### Glossary

| Term   | Description  |
|--|--|
| <b>National Occupational Standards (NOS)</b> | NOS define the measurable performance outcomes required from an individual engaged in a particular task. They list down what an individual performing that task should know and also do.   |
| <b>Qualification</b>                         | A formal outcome of an assessment and validation process which is obtained when a competent body determines that an individual has achieved learning outcomes to given standards   |
| <b>Qualification File</b>                    | A Qualification File is a template designed to capture necessary information of a Qualification from the perspective of NSQF compliance. The Qualification File will be normally submitted by the awarding body for the qualification. |
| <b>Sector</b>                                | A grouping of professional activities on the basis of their main economic function, product, service, or technology.   |
