

Revision made by NSDA_25 May, 2015

QUALIFICATION FILE – CONTACT DETAILS OF SUBMITTING BODY

Name and address of submitting body:

Indian Iron and Steel Sector Skill Council

Address:- Royal Exchange, 6 N.S. Road, Kolkata- 700 001

Tel: 09831052652

Name and contact details of individual dealing with the submission

Name: Parimal Biswas

Position in the organisation: Chairman of NOS Committee & Director IISSSC

Address if different from above

Same as above

Tel number(s): 09831052652

E-mail address: parimalbiswas.iisssc@iiwindia.com

List of documents submitted in support of the Qualifications File

1. Qualification Pack
2. RFP for development of Occupational Standards
3. IISSSC Protocol for Accreditation of Assessment Agencies and Assessment Framework.
4. Sample of assessors guide
5. Occupational Map & Progression matrix
6. List of companies and Industry associations participated in the development of this qualification.
7. List of QP/NOS validating companies.

8. QUALIFICATION FILE SUMMARY

Qualification Title	Screen & Crusher Operator		
Body/bodies which will assess candidates	Affiliated Assessment Agencies		
Body/bodies which will award the certificate for the qualification.	Indian Iron & Steel Sector Skill Council		
Body which will accredit providers to offer the qualification.	Indian Iron & Steel Sector Skill Council		
Occupation(s) to which the qualification gives access	Screen & Crusher Operator		
Proposed level of the qualification in the NSQF.	3		
Anticipated volume of training/learning required to complete the qualification.	200 hrs		
Entry requirements / recommendations.	Class 10th Pass ITI Pass and 18 years of age		
Progression from the qualification.	Supervisor-Raw Material Handling		
Planned arrangements for RPL.	RPL arrangements and policies are under development. The guidelines should be ready in 2-3 months.		
International Comparability	<p>While writing the NOSs the European, Australian and Canadian NOSs were also referred to and an effort was taken to maintain comparability in the technical part of the NOSs.</p> <p>However Numeracy, literacy and basic science levels are lower in order to match with the existing Indian conditions.</p>		
Formal structure of the qualification			
Title of unit or other component (include any identification code used)	Mandatory/ Optional	Estimated size (learning hours)	Level
ISC/N0105: Carry out inspection and monitor the screening and crushing unit	Mandatory	200	3
ISC/N0106: Carry out operation of screening and crushing Unit	Mandatory		
ISC/N0107: Carry out basic maintenance activities of screening and crushing unit	Mandatory		
ISC/N0008: Use basic health and safety practices at workplace	Mandatory		
ISC/N0009: Work effectively with others	Mandatory		

Please attach any document giving further detail about the structure of the qualification – eg a Curriculum or Qualification Pack.

Give details of the document here: Qualification pack is sent with the Qualification file

SECTION 1

ASSESSMENT

Name of assessment body:

Prima Competencies Pvt. Ltd.

Will the assessment body be responsible for RPL assessment?

YES

Selection and due diligence of applicants are done as per IISSSC Protocol for Assessment Bodies and Assessment Framework.

Describe the overall assessment strategy and specific arrangements which have been put in place to ensure that assessment is always valid, consistent and fair and show that these are in line with the requirements of the NSQF:

The emphasis is on 'learning-by-doing' and practical demonstration of skills and knowledge based on the performance criteria. The assessment papers are developed by Subject Matter Experts (SME) available with the Assessment Agency as per the performance and assessment criteria mentioned in the Qualification Pack. The assessments papers are also checked for the various outcome based parameters such as quality, time taken, precision, tools & equipment requirement etc. The assessment sets are then reviewed by IISSSC official for consistency. The assessments are designed so as to assess maximum parts during the practical hands on work. Duties and responsibility of a welder are also assessed. The technical limitations at the training centres are taken care in theory and viva. Criteria such as use of lift to pick heavy objects or selection of fire extinguisher during a fire, first aid are also assessed under theory/viva.

Different NDT as well as Destructive Testing carried out on the job as per welding standard.

The assessment agencies are instructed to hire assessors with integrity, reliability and fairness. Each assessor shall sign a document with its assessment agency by which they commit themselves to comply with the rules of confidentiality and conflict of interest, independence from commercial and other interests that would compromise impartiality of the assessments. The assessment agencies are instructed to Ideally have assessor with minimum 15 years industry experience as an ITI graduate / minimum 10 years' industry experience as diploma engineer and minimum 5 years' industry experience as Graduate Engineer / Master Degree holder.

The assessors selected by Assessment Agencies are scrutinized and made to undergo training and introduction to IISSSC Assessment Framework, competency based assessments, assessors guide etc.

The assessors are provided with assessors guide developed by the Subject Matter Expert of the assessment agency as per the assessment framework. The assessment guides are developed to ensure the maximum possible consistency / transparency in the assessment by different assessors and elaborate on the following

1 Qualification Pack Structure

2 Guidance for the assessor to conduct theory, practical and viva assessments

3 Guidance for trainees to be given by assessor before the start of the assessments.

4 Guidance on assessments process, practical brief with steps of operations practical observation checklist Attendance Sheet and mark sheet

5 Viva guidance for uniformity and consistency across the batch

6 Guidance on assessment evidence collection

A sample format of Assessment Guide for Fitter-Fabrication is attached. Similar Assessor Guides are developed and shared with the assessors before the start of the assessments as standard practices for all assessments by IISSSC. The Sample of Assessor Guide is attached as Annexure.

The assessment results are backed by evidences collected by assessors.

1 The assessor needs to collect a copy of the attendance for the training done under the scheme.

The attendance sheets are signed and stamped by the In charge /Head of the Training Centre.

2 The assessor needs to verify the authenticity of the candidate by checking the photo ID card issued by the institute as well as any one Photo ID card issued by the Central/Government. The same needs to be mentioned in the attendance sheet. In case of suspicion, the assessor should authenticate and cross verify trainee's credentials in the enrolment form.

3 The assessor needs to punch the trainee's roll number on all the test pieces. Different sections can have alpha numbering. For example a student roll number is ABC then the three pieces can be numbered and punched as ABC1, ABC2 and ABC3.

4 The assessor needs to take a photograph of all the students along with the centre name/banner at the back as evidence.

5 The assessor needs to carry a camera to click photograph of the trainees working on the job and giving theory exam as evidence.

6 The assessor also needs to carry a photo ID card.

7 The assessor also needs to take the photographs as evidence from appropriate angles/sides of the final work piece/job submitted by the trainee.

8 The assessor needs to indicate the parts for different Destructive testing as per standards mentioned in the assessment guide.

The details on assessment framework are elaborated in IISSSC Protocol for Accreditation of Assessment Agencies and Assessment Framework.

All IISSSC accredited Assessment Agency follow the "IISSSC Protocol for Accreditation of Assessment Agencies and Assessment Framework". The assessment by assessment agency will be completely based on the assessment criteria as mentioned in the Qualification Pack. Each NOS in the Qualification Pack (QP) will be assigned a relative weightage for assessment based on the criticality of the NOS. Therein each Performance Criteria in the NOS will be assigned marks for or practical based on relative importance, criticality of function and training infrastructure.

The following tools are proposed to be used for final assessment:

1 Practical Assessment: This will comprise of a test hands on job to be prepared as per figure/engineering drawing by following appropriate working steps, using necessary tools, equipment and instruments.

Candidate's aptitude, safety consciousness, quality consciousness etc. will be ascertained by observation and will be marked in observation checklist.

The end product will be measured against the specified dimensions and standards (like tolerance, finish, accuracy, time etc.) to gauge the level of his skill achievements

2 Viva/Structured Interview: This tool will be used to assess the conceptual understanding and the behavioural aspects as regards the job role and the specific task at hand. It will also include questions on safety, quality, environment, tools and equipment's etc.

3 Written Test: Under this test few key items which cannot be assessed practically will be assessed. The written assessment will comprise of

- i. True / False Statements
- ii Multiple Choice Questions
- iii Matching Type Questions.

Optical Mark Recognition (OMR)/ Online System for this will be preferred on place of written test subject to available required infrastructure.

Please attach any documents giving further information about assessment and/or RPL.

Give details of the document(s) here:

ASSESSMENT EVIDENCE

Complete the following grid for each grouping of NOS, assessment unit or other component as per the assessment criteria. Insert the required number of rows.

CRITERIA FOR ASSESSMENT OF TRAINEES

Screen & Crusher Operator

ISC/Q0102

Indian Iron & Steel Sector Council

Guidelines for Assessment

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below)
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criteria
5. To pass the Qualification Pack, every trainee should score a minimum of 70% in every NOS further each trainee must also score a minimum of 40% in each element assessed within every NOS
6. In case of successfully passing only certain number of NOS's, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack

Assessable Outcome	Assessment Criteria	Marks Allocated			
		Total Marks 1000	Out Of	Theory	Practical
ISC/N0105: Carry out inspection and monitor the screening and crushing unit	PC1. Collect and interpret information from previous day/shift logbook	400	10	5	5
	PC2. Interpret the log book to understand the readiness of the crusher/ball mill, screens, grate bars, grizzly's, sheave etc.		15	5	10
	PC3. Plan to execute the assigned job		20	5	15
	PC4. Seek clarification from supervisor in case of any doubt		15	5	10
	PC5. Ensure availability of the checklist for regular inspection		10	5	5
	PC6. Inspect conveyor galleries for cleanliness		20	5	15

PC7. Inspect physical health of belts conveyor for scratch, cut, hole, pilled-off ply and its training for proper running. For chain conveyor inspect the physical condition of its tray and links	20	5	15
PC8. Inspect rollers (bolts, troughing and return), roller stands, lagging of H.E. & T.E. drums, physical condition of T.E. drum stand, structure and tension screws	20	5	15
PC9. Inspect gravity take-up pulley wherever required	20	5	15
PC10. Inspect crusher teeth, segment, roll. Shaft brush and crusher gap	20	5	15
PC11. Inspect ball mill wherever necessary	20	5	15
PC12. Inspect grate bars, grills, grizzly rolls, discs, gear trains and oil pumps etc.	20	5	15
PC13. Inspect the screens/sheave, vibration motors, "V" belts etc.	15	5	10
PC14. Inspect all relevant equipment as well as safety interlocking's, pull chords, heat sensors, speed pick-up relays etc. wherever applicable	20	5	15
PC15. Inspect pollution control/dust catching systems for their control level and efficiency	15	5	10
PC16. Ensure appropriate display of placards for units under shut-down and maintenance	15	5	10
PC17. Escalate deviations or abnormalities to supervisor	15	5	10
PC18. Ensure working and the standby unit e.g. grizzly's, grills, grate bars, screen, devices of crushers are in proper condition	15	5	10

	PC19. Ensure in case of absence of parallel stream the running worthiness of the available stream / section is restored by means of carrying out necessary rectification process		15	5	10
	PC20. Ensure monitoring of the working unit e.g. grizzly's, screens, grate bars, grizzly's etc. by visual inspection		20	5	15
	PC21. Ensure continuous monitoring of spillage of raw materials and take appropriate steps as required		20	5	15
	PC22. Ensure the conveyor belt is properly trained (to arrest belt shifting)		20	5	15
	PC23. Note anomaly if any and inform supervisor, coordinate for taking corrective measures		20	5	15
		Total	400	115	285
ISC/N0106: Carry out operation of screening and crushing unit	PC1. Understand the sequence of screening and crushing activities	250	20	5	15
	PC2. Interpret the previous shift/day log book to check readiness of the operating stream		20	5	15
	PC3. Coordinate with the interlinked departments (e.g. blast furnace, raw material handling, traffic etc.) as necessary to start the screening and crushing system		20	5	15
	PC4. Seek clarification from supervisor in case of any doubt/deviation		15	5	10
	PC5. Select position of feeder valve as per plan for feeding to blast furnace/wagon loading		20	5	15
	PC6. Carry out visual inspection of the unit for starting the operation		15	0	15

	PC7. Coordinate for loco and wagon placement (in case of wagon loading) and repeat the process as necessary during operation		15	0	15
	PC8. Start crusher from the respective work site control board		15	0	15
	PC9. Interpret the voice communication clearly for starting the operation process		20	5	15
	PC10. Ensure starting the raw material handling system		15	0	15
	PC11. Ensure in case of wagon loading proper signal is being provided		20	5	15
	PC12. Carry out periodical inspection of running units of screening and crushing system		20	5	15
	PC13. Record the deviations/faults as detected through visual inspection and inform the supervisor		15	5	10
	PC14. Coordinate with the concerned team/department for rectification/replacement as necessary to ensure uninterrupted operation		10	5	5
	PC15. Maintain log book and record the spill over job, running condition of the unit and abnormalities if any for next shift		10	5	5
		Total	250	55	195
ISC/N0107: Carry out basic maintenance activities of screening and crushing unit	PC1. Analyse the inspection data /report to identify the sections/parts/equipments pertaining to the screening and crushing system that need rectification/replacement	100	15	5	10
	PC2. Plan for rectification/replacement of sections/parts/equipments of both the running and/or standby streams as a part of routine/preventive maintenance		15	5	10

	PC3. Ensure that all maintenance activities are carried out without/minimum interruption of operation to maintain the planned production schedule		15	5	10
	PC4. Seek help/clarification from supervisor in case of any doubt		10	5	5
	PC5. Ensure to spare the stream/parts/sections where maintenance activities are to be carried out		15	5	10
	PC6. Communicate the maintenance team to start the activities		10	5	5
	PC7. Communicate the co-workers on the stream/ parts/sections where the maintenance activities are carried out to prevent any untoward incidents		10	5	5
	PC8. Record the maintenance data/activities in the log book and inform supervisor on completion of the maintenance job		10	5	5
		Total	100	40	60
ISC/N0008: Use basic health and safety practices at the workplace	PC1. Use protective clothing/equipment for specific tasks and work conditions	150	10	5	5
	PC2. State the name and location of people responsible for health and safety in the workplace		5	0	5
	PC3. State the names and location of documents that refer to health and safety in the workplace		1	0	1
	PC4. Identify job-site hazardous work and state possible causes of risk or accident in the workplace		9	5	4
	PC5. Carry out safe working practices while dealing with hazards to ensure the safety of self and others state methods of accident prevention in the work environment of the job role		10	5	5

PC6. State location of general health and safety equipment in the workplace	5	0	5
PC7. Inspect for faults, set up and safely use steps and ladders in general use	5	0	5
PC8. Work safely in and around trenches, elevated places and confined areas	5	0	5
PC9. Lift heavy objects safely using correct procedures	5	0	5
PC10. Apply good housekeeping practices at all times	1	0	1
PC11. Identify common hazard signs displayed in various areas	6	5	1
PC12. Retrieve and/or point out documents that refer to health and safety in the workplace	4	0	4
PC13. Use the various appropriate fire extinguishers on different types of fires correctly	9	5	4
PC14. Demonstrate rescue techniques applied during fire hazard	10	5	5
PC15. Demonstrate good housekeeping in order to prevent fire hazards	1	0	1
PC16. Demonstrate the correct use of a fire extinguisher	4	0	4
PC17. Demonstrate how to free a person from electrocution	5	0	5
PC18. Administer appropriate first aid to victims as required e.g. in case of bleeding, burns, choking, electric shock, poisoning etc.	10	5	5
PC19. Demonstrate basic techniques of bandaging	5	0	5
PC20. Respond promptly and appropriately to an accident situation or medical emergency in real or simulated	10	5	5

	environments				
	PC21. Perform and organize loss minimization or rescue activity during an accident in real or simulated environments		5	0	5
	PC22. Administer first aid to victims in case of a heart attack or cardiac arrest due to electric shock, before the arrival of emergency services in real or simulated cases		5	0	5
	PC23. Demonstrate the artificial respiration and the CPR Process		5	0	5
	PC24. Participate in emergency procedures		5	0	5
	PC25. Complete a written accident/incident report or dictate a report to another person, and send report to person responsible		9	5	4
	PC26. Demonstrate correct method to move injured people and others during an emergency		1	0	1
		Total	150	45	105
ISC/N0009: Work effectively with others	PC1. Accurately receive information and instructions from the supervisor and fellow workers, getting clarification where required	100	10	5	5
	PC2. Accurately pass on information to authorized persons who require it and within agreed timescale and confirm its receipt		10	5	5
	PC3. Provide information to others clearly, at a pace and in a manner that helps them to understand		10	0	10

PC4. Display helpful behaviour by assisting others in performing tasks in a positive manner, where required and possible	10	5	5	
PC5. Consult with and assist others to maximize effectiveness and efficiency in carrying out tasks	10	5	5	
PC6. Display appropriate communication etiquette while working	10	0	10	
PC7. Display active listening skills while interacting with others at work	10	0	10	
PC8. Use appropriate tone, pitch and language to convey politeness, assertiveness, care and professionalism	10	5	5	
PC9. Demonstrate responsible and disciplined behaviours at the workplace	15	5	10	
PC10. Escalate grievances and problems to supervisor	5	0	5	
	Total	100	30	70

SECTION 2

EVIDENCE OF NEED

What evidence is there that the qualification is needed?

While collecting data from the companies for the occupational map, we also took feedback from industry, which was collected with respect to roles for which qualification packs development, was to be prioritized. This was largely based on volume of people required, quantitative and qualitative shortfall which the Industry feels they face. Governing council of IISSSC gave final approval and endorsement for the same.

What is the estimated uptake of this qualification and what is the basis of this estimate?

Skills Gap analysis Reports for industry demand and secondary research data, though these do not lend to accurate demand projection. The link to NSDC Human Resource & Skills Requirement in IISSSC

- Feedback from industry for demand though again sample size may not lend to accurate figures
- Training duration, and current and potential training capacity envisaged
- An LMIS development initiative is being put in place to be more precise regarding the demand and supply

What steps were taken to ensure that the qualification(s) does/do not duplicate already existing or planned qualifications in the NSQF?

NSDC list of Approved and Under-Development QPs was checked prior to commissioning the work

NSDC QRC team also confirmed the same

What arrangements are in place to monitor and review the qualification(s)? What data will be used and at what point will the qualification(s) be revised or updated?

Agencies have been appointed by the SSC to interact with training providers to gather feedback in implementation.

Employer feedback will be sought post- placement.

A formal review is scheduled after two year time.

Please attach any documents giving further information about any of the topics above.

Give details of the document(s) here:

SECTION 3

SUMMARY EVIDENCE OF LEVEL

Summary of Direct Evidence:

- Understand assigned job in accordance with prior planning
- Carry out the routine inspection of screening and crushing unit
- Understand importance of proper functioning of the screening and crushing system and continuous monitoring for uninterrupted operation
- Understand operation of screening and crushing system
- Plan and coordinate for smooth operation
- Carry out the operational activities
- Plan routine and preventive maintenance that need to be carried out for screening and crushing system
- Coordinate to carry out maintenance activities of screening and crushing system
- Use Health and safety procedures, Fire safety procedures & Emergencies, rescue and first-aid procedures at workplace
- Ensure appropriate communication with superiors, peers and others as applicable at work place
- Demonstrate appropriate behaviour and etiquette at work place

Justify the NSQF level allocated to the QP by building upon the five descriptors of NSQF. Explain the reasons for allocating the level to the QP.

Generic NOS is/are linked to the overall authority attached to the job role.

Screen & Crusher Operator (ISC/Q0102)					
Process required	Professional Knowledge	Professional Skills	Core Skills	Responsibility	Level
<p>The job deals with optimising the yield of various raw materials e.g. coke, sinter, iron ore, lime stone, dolomite, bauxite, manganese etc. required to be fed into blast furnace for iron making. The activities involved are cliffing/breaking various oversized raw materials, separating the desired range of their size fractions as attributed to them. This also includes separation of under sized raw materials step by step through various types of screens; grizzly's or grates bars of different size specifications. The job holder is</p>	<p>The job holder should have knowledge of raw material handling system, various safety interlocking systems that exists in material handling system, importance of size fraction, moisture contents of raw materials for blast furnace operation, steps to be taken in case of power failure (re-starting the cutter on restoration of power system), safety hazards associated with running conveyors,</p>	<p>The job holder should be able to understand the assigned job of inspection and monitoring of the screening and crushing unit, carry out the routine inspection of screening and crushing unit, and understand the importance of proper functioning of the screening and crushing system and continuous monitoring for uninterrupted operation. The job holder should be able to recall & demonstrate</p>	<p>The job holder should be able to construct simple sentences and express ideas clearly through written communication, fill up appropriate technical forms, process charts, activity logs , read and interpret engineering and machine drawings of screening and crushing system, read and understand manuals, health and safety instructions, memos, reports, job</p>	<p>The job holder is responsible for carrying out the routine inspection of screening and crushing unit under close supervision, continuous monitoring for uninterrupted operation, planning & coordinating for smooth operation and carrying out the operational activities as per instruction given by supervisor, planning the routine and preventive maintenance that need to be carried out for screening and crushing system, coordinating to carry out</p>	3

expected to perform limited range of activities which are routine & predictable	cutters, ball mills, grate bars, grizzly's etc. The job holder should have knowledge of basic details, process & principles	practical skill which are routine & repetitive and involves narrow range of application	cards etc. The job holder should be able to communicate with the supervisor & subordinate with clarity.	maintenance activities and reporting any deviation beyond the scope of his role. The job holder is responsible for to work under close supervision & have responsibility for own work & learning.	
Level 3	Level 3	Level 3	Level 3	Level 3	

OTHER EVIDENCE OF LEVEL [This need only be filled in where evidence other than primary outcomes was used to allocate a level] (Optional)

Summary of other evidence (if used):

Accepted by QRC and validated by industry

SECTION 4

EVIDENCE OF RECOGNITION OR PROGRESSION

What steps have been taken in the design of this or other qualifications to ensure that there is a clear path to other qualifications in this sector?

Horizontal and vertical mobility options have been articulated

Please attach any documents giving further information about any of the topics above.
