Pest Control Market Outlook - 2025

Pest control is used for killing, or repelling attacks of pests such as insects, rodents, and bed bugs. These pests not only damage the crops but also affect the human life through various diseases. Different types of professional pest control treatments to control or kill pest population comprises chemical, biological, and mechanical. Inspection is the fundamental step for any type of pest control service. The global pest control market was valued at \$18,214.7 million in 2017, and is expected to reach \$27,609.8 million by 2025, registering a CAGR of 5.2% from 2018 to 2025.

The growth of the market is driven by its increase in demand from agriculture-based countries such as Brazil, France, India, China, Australia, Russia, Mexico, and others. In addition, climate change across the globe is also a significant factor for upsurge in demand for pest control products and services because climate change attributes to rise in temperature, whereas high temperature is ideal condition for increase in pest population. However, increase in concerns regarding the levels of toxicity in pesticides and the resultant health issues that arise due to the over use of toxic pesticides hamper the pest control market growth to a certain extent. Consumers, especially in the agricultural sector and food industry, are focused toward opting for pesticides with low toxic levels, owing to their associated adverse effects on health.

Global Pest Control Market

OPPORTUNITIES AND FORECASTS,
2018-2025

Global Pest Control Market
is expected to reach
\$27,609.8 million by 2025.

Growing at a **CAGR of 5.2%**

The pest control market is segmented into type, pest type, application, and region. Based on type, the market is divided into chemical, mechanical, biological, and others. Based on pest type, the market is classified into insects, termites, rodents, and others. Based on application, the market is categorized into commercial, residential, agriculture, industrial, and others. Based on region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

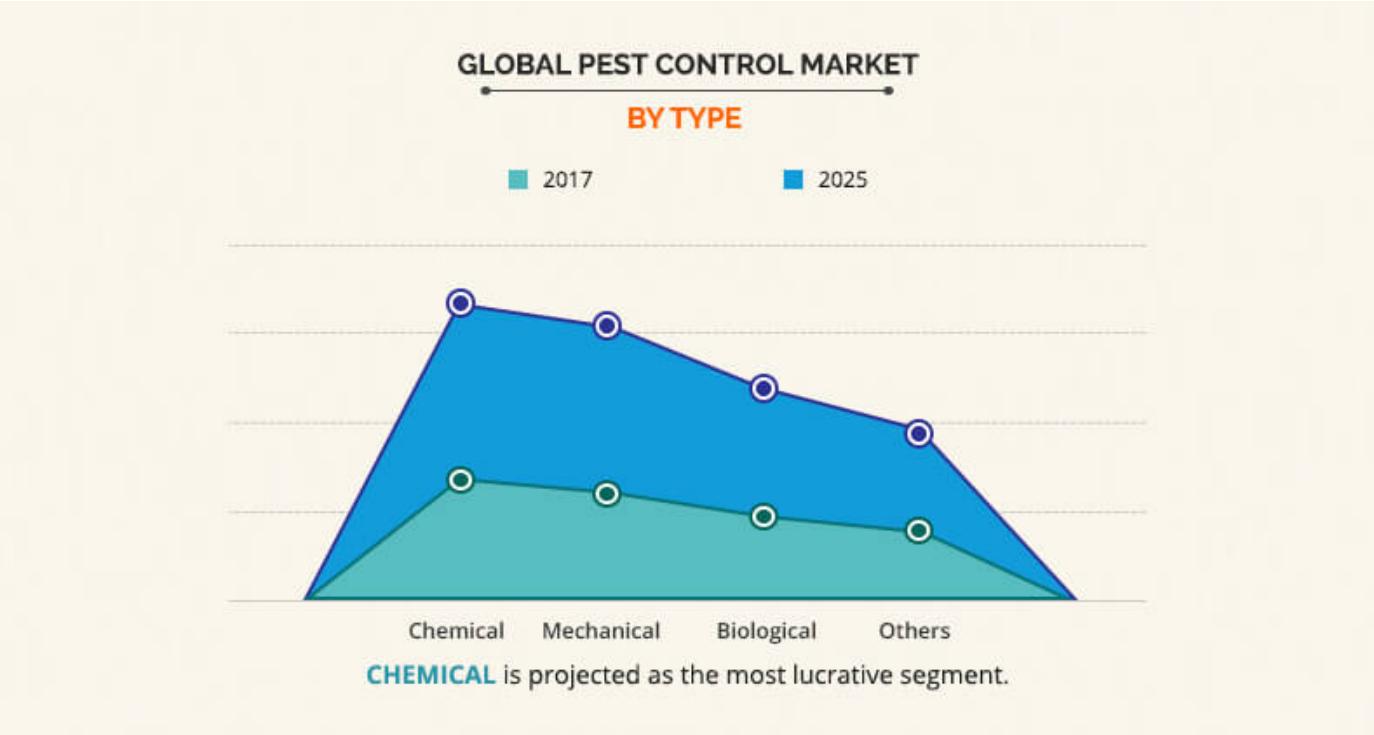

Asia-Pacific is expected to be fastest growing region for the **pest control market** (<https://www.alliedmarketresearch.com/press-release/pest-control-market.html>). The region comprises emerging economies, such as China and India, which have considerable cultivable land to grow crops. Moreover, China is one of the leading countries for pest control due to its rapid urbanization and technological advancement in agriculture. This has led to higher standards of living among consumers, resulting in the rise in demand for pest control products and services.

The pest control market analysis covers in depth information of major industry participants. Some of the major players in the market include BASF SE, Bayer AG, Rentokil Initial Plc., Ecolab, Rollins, Inc., Anticimex, and FMC Corporation. The other players in the value chain include The ServiceMaster Company, LLC, Syngenta, Dodson Pest Control, Inc., and Lindsey Pest Services.

To stay too competitive in the market, key players are adopting different strategies such as product launch, business expansion, and acquisition. In an instance, BASF launched multi-purpose, undetectable insecticide product named Seclira WSG in Australia. Seclira's unique colorless, non-staining and odorless formulation is ideal for use in areas where appearance is important. Seclira WSG received registration from the Australian Pesticides and Veterinary Medicines Authority and is now approved for the use throughout in Australia. This product launch has reinforced company's product portfolio.

In addition, Rentokil Initial plc, acquired Vector Disease Acquisition, LLC (VDA). Vector Disease Acquisition, LLC (VDA) is North America's one of the largest providers of mosquito control services. Vector Disease Acquisition, LLC (VDA) is headquartered in Little Rock, Arkansas, and operates from 52 offices in 32 U.S. states. This acquisition has reinforced company pest control business and presence in North America.

Pest Control Market Share, by Pest Type

Based on pest type, the market is divided into insects, termites, rodents, and others. Insects had the largest share in

2017 and is anticipated to dominate the market during the forecast period. Insecticides continue to be a dominant pesticide as crop losses from insects has become more evident.

Pest Control Market Share, by Application

(<https://www.alliedmarketresearch.com/images/pest-control-market-4.jpg>)

Get more information on this report : Request Sample Pages (<https://www.alliedmarketresearch.com/request-sample/2328>)

Based on application, the market is classified into commercial, residential, agriculture, industrial, and others. Among all, the commercial segment has the largest share in 2017, as there is a necessity to prevent pest infestation to protect the health of employees and customers in commercial buildings. After commercial, agriculture is anticipated to be the dominant application, this is attributed to reduce the loss of crops.

Pest Control Market Share, by Region

Based on region, the pest control market is analyzed across North America, Europe, Asia-Pacific, and LAMEA. North America dominated the market in 2017, accounting for the highest share, and is anticipated to maintain this trend throughout the forecast period. This is attributed to the high awareness about the pest attacks and damage or associated diseases. Furthermore, Asia-Pacific is anticipated to be the fastest growing region in the global pest control market; this is due to rapid infrastructure development in countries such as India and China.

Key Benefits for Pest Control Market:

- The report provides an in depth analysis of the pest control market forecast with current and future trends
- This report highlights the key drivers, opportunities, and restraints of the market along with an impact analysis of the forecast period
- Porter's five forces analysis helps to analyze the potential of the buyers & suppliers and the competitive scenario of the pest control industry for strategy building
- A comprehensive analysis of the factors that drive and restrain the growth of the market is provided.
- The qualitative data in this report aims on market dynamics, pest control market trends, and developments.
- The pest control market size is provided in terms of revenue.
- An extensive analysis of various regions provides insights that are expected to allow companies to strategically plan their business moves.
- The profiles of key players along with their key strategic developments are enlisted in the pest control report

Pest Control Market Segmentation

The pest control market is segmented based on type, pest type, application, and region.

Key Market Segments

By Type

- Chemical
- Mechanical

- Biological
- Others

By Pest type

- Insects
- Termites
- Rodents
- Others

By Application

- Commercial
- Residential
- Agriculture
- Industrial
- Others

By Region

- North America
 - U.S.
 - Canada
 - Mexico
- Europe
 - Germany
 - UK
 - France
 - Italy
 - Spain
 - Rest of Europe
- Asia-Pacific
 - China
 - Japan
 - India
 - Australia
 - South Korea
 - Rest of Asia-Pacific
- LAMEA
 - Brazil
 - Saudi Arabia
 - South Africa
 - Rest of LAMEA
